7. Evaluating Progress Toward Measurable Goals MCM 4

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The Village's Construction Site Storm Water Runoff Control program is equivalent protection to the NYSDEC SPDES General Permit for Stormwater Discharges from Construction Activity. This includes reviewing Stormwater Pollution Prevention Plans (SWPPP) submitted to the Village for projects disturbing an acre or greater of land. The Site Plan review process with the Planning Board will take note of any potential discharges of pathogens to the water bodies.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

Construction SWPPPs are typically not required because the Village's zoning and clearing restrictions prohibit new clearing (site disturbance) over one acre. The need to prepare a SWPPP is considered during the Village Zoning/Planning Board processes. Village Permit Conditions often require erosion and sediment controls for smaller sites and post-construction runoff controls for new development.

C. How many times was this observation measured or evaluated in this reporting period?

10

(ex.: samples/participants/events)

D. Has your MS4 made progress toward this measurable goal during this reporting period?

● Yes ○ No

E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?

● Yes ○ No

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

The Village will review SWPPPs as they are submitted to the Village for review, comment and approval. The Village will also monitor for the number of complaints received and enfocement actions taken.
